SUSTAINABILITY SKILLS

- *GHG Protocol*
- *CSRD / ESRS*
- *GHG Accounting*
- *Sustainability Reporting*
- *Climate Risk Assessment*
- *Environmental Data Analysis*
- *Stakeholder Engagement*
- *Project Management (Scrum)*

CORE TOOLS

- *Python*
- *SQL (PostgreSQL & Google BigQuery)*
- *R*
- *Microsoft Excel*
- *Power BI*
- *ArcGIS / QGIS*
- *AI Tools*

PROFILE

MSc graduate in Urban Environmental Management with practical experience in environmental consultancy, sustainability data analysis, GHG accounting and reporting.

Skilled in data validation, technical documentation, project coordination and applying sustainability frameworks to support accurate reporting and effective collaboration.

Motivated to apply these competencies to support sustainability administration, regulatory compliance and commercial operations in the renewable fuels sector.

PROFESSIONAL EXPERIENCE

Transformation Designer (Trainee)

Digital Society School *Feb 2026 – Jun 2026 | Amsterdam*

- Engaged Municipality of Amsterdam employees through interviews and co-creation sessions, analysing qualitative data to **identify operational challenges and improvement opportunities** in the social benefit application process.
- Co-developed UN-FOLDED, a workshop-based tool to help public-sector teams **assess gaps between legislation and service delivery** across legal, policy, IT, communications and frontline functions.
- Served as Scrum Master for a five-person **multidisciplinary team**, coordinating sprint activities and priorities to ensure **timely delivery of project** outcomes.
- Translated project findings into **public-facing content** and presentation materials, making project outcomes accessible to non-technical audiences

Researcher (Internship)

Wageningen Environmental Research (WENR) *May 2023 – Sep 2023 | Wageningen*

- **Topics**: soil regeneration, nature-inclusive urban development and the Europe Food 2100 project.
- Designed and facilitated **stakeholder engagement sessions**, developing survey and interview materials and **analysing 75+ responses** to identify key perspectives and actionable insights.
- Coordinated participant registration and **stakeholder communications** for the Europe Food 2100 project, supporting the delivery of a cross-sector workshop involving 30+ experts.
- Conducted **desk research** across scientific literature, institutional publications and policy sources, synthesising evidence to support ongoing environmental research projects.
- **Contributed to the biannual assessment** of WENR programme impacts by gathering and organising supporting evidence**.**

Urban Planner & Environmental Data Analyst

Toyin Ayinde & Associates *May 2019 – Jul 2021 | Lagos*

- Collected, structured and analysed socioeconomic, infrastructure and community data, providing baseline insights to inform **urban planning and development projects**.
- **Integrated drone imagery, satellite data and geospatial analysis** to assess project areas, strengthening the spatial evidence used to support planning assessments and recommendations.
- Synthesised **technical analysis and project findings** into inception, interim and final reports, translating complex information into clear outputs for clients and project stakeholders.
- Coordinated activities across multiple consultancy engagements and maintained **direct communication with clients and stakeholders**, supporting effective project delivery and alignment with project requirements.

LANGUAGES

English
Fluent, professional

Dutch
NT2: B1

INTERESTS

- *Nature & outdoor exploration*
- *Travel*
- *Reading*
- *Singing*
- *Cooking*

EDUCATION

MSc Urban Environmental Management

Wageningen University & Research *2021 – 2024 | Netherlands*

- Specialisation: Environmental Systems Analysis
- Grade: 8/10

BTech Urban & Regional Planning

Federal University of Technology Akure *2013 – 2018 | Nigeria*

- Specialisation: Remote Sensing and Geospatial Analysis
- Grade: 9/10

PROJECTS

GHG Inventory Analysis

OnePointFive fellowship *Mar 2025 – May 2025 | USA (remote)*

- Developed the Scope 1 and 2 GHG inventory for two U.S. facilities based on the **GHG Protocol accounting framework,** including setting organisational boundaries and reporting approach.
- Collected, validated and analysed operational data, applying EPA emission factors and IPCC GWP values to support **GHG emissions calculations**.
- Analysed key emission sources and identified reduction opportunities to inform **decarbonization levers** and **target setting**.
- Developed an **interactive dashboard to monitor key KPIs** (emissions performance, main drivers and reduction opportunities) and communicate to non-technical stakeholders.

Climate Risk Exposure Index

Self-project *Apr 2026 – May 2026 | Netherlands*

GitHub link: https://github.com/Monica-Bonu/Climate-Risk-Exposure-Index

- Developed a Python-based **physical climate-risk exposure index** covering 21 countries, integrating World Bank climate data on temperature extremes, extreme precipitation and drought to enable comparative climate-risk screening.
- Translated complex climate datasets into ranked results, visualisations, and an interactive dashboard, enabling clear **identification and comparison of countries** with higher physical climate-hazard exposure.
- Applied **CSRD (ESRS E1)** and **TCFD** physical climate-risk concepts to the methodology, demonstrating a country-level screening approach for identifying higher-exposure geographies.

Cyclistic Data Analytics Capstone

Google Data Analytics *Oct 2023 – Dec 2023 | Coursera*

GitHub link: https://github.com/Monica-Bonu/Cyclistic-Trips-Analytics

- Cleaned, structured and prepared 1M+ trip records for analysis, **transforming a large raw dataset into reliable, analysis-ready information**.
- Analysed **customer travel patterns** and service usage across user segments, identifying behavioural differences relevant to membership conversion strategies.
- Translated analytical findings into actionable business recommendations, **turning complex data into insights** supporting customer growth and data-driven decision-making.

CERTIFICATION & TRAINING

- CSRD Fundamentals (Level 1) - Sustainability Reporting Institute
- Prompt Engineering for ChatGPT - Vanderbilt University
- Google Data Analytics Professional Certificate – Google
